From: Chief Ken Schwerman

I just wanted to thank you for your help last week. I had someone (locally) change the hydraulic filter and they installed the new one dry. This caused approximately a pint of air to get into the system. You walked me through a quick diagnosis and assisted me with purging the air from the system. The 10kw generator set we currently use has given us 8 years of flawless service. Other than filter and fluid changes, your system has never caused us any worries or headaches. I would recommend your systems to anyone that desires easy to use, dependable generators.

Respectfully;
